

## ACCESSORIES

## CORE LOSS TESTER MAGNETIC PAPER

The LEXSECO magnetic paper is a micro-encapsulated film that reacts to the presence of a magnetic field. The film aligns with the magnetic lines and permits the user to view an electric motor's static magnetic field which can identify problems with its construction and integrity.

The magnetic paper comes in 12" (305mm) and 18" (457mm) widths. The 12" (305mm) wide product is available in pre-cut 12" (305mm) lengths. Both the 12" (305mm) and 18" (457mm) wide products are available in custom lengths in 12" (305mm) increments.

### MAGNETIC PAPER & WAND

PART NUMBER	DESCRIPTION
L00400	Magnetic Paper, 12" x 12" (305mm x 305mm)
L00401	Magnetic Paper, 12" (305mm) wide and sold in user specified lengths in 12" (305mm) increments
L00402	Magnetic Paper, 18" (457mm) wide and sold in user specified lengths in 12" (305mm) increments
L00450	Magnetic Wand—used to reset magnetic paper

- Enables user to view a motor's static magnetic field
- Identifies faulty motor bars
- Re-useable
- 12" (305mm) & 18" (457mm) widths available
- Custom lengths available
